Nationwide Risk Management Services

Providing industry leading services for:

Commercial Agribusinesses
Food and Beverage Industries
Fuel and Energy
Farms
Risk Management Services delivered by an industry leader

We believe that successful companies view risk management as an opportunity to help keep workers safer, protect assets, increase productivity, enhance product quality and help boost profits. Over the years, we’ve developed extensive risk management services and programs specific to your industry.

Our vision is to become the premier provider of risk management solutions for the Agribusiness, Food and Beverage, Fuel and Energy, and Farm industries.

Nationwide’s relationship with agriculture can be dated back to 1909 when Iowa grain elevator and farm leaders founded the Farmers Cooperative Elevator Mutual Insurance Association which later became Farmland Insurance and was acquired by Nationwide in 1982, a company that was founded in 1926 by Ohio farmers who formed the Ohio Farm Bureau Insurance Company. Today we partner with the Farm Bureau’s in nine states across the country. Our commitment continues within the advocacy programs including Grain Bin Safety Week and Golden Owl contest.
Client Assessment

We understand there are a variety of risks facing your business. A member of our Risk Management Services team will meet with you for an initial consultation to discuss your operations, evaluate exposures and controls, and identify opportunities for improvement. Along with your agent, this will help us in partnering with you to determine what additional resources may enhance your existing risk management efforts.

Some exposures may warrant additional in-depth assessment:

- Property
- Fleet
- Workers’ Compensation
- Product Liability
Risk Management Services

Nationwide Risk Management specializes in helping you identify and reduce hazards and conducting safety training to make a real difference in your operations. Our services are determined individually—based on your unique risk characteristics and needs. And best of all—these services are complimentary.*
