Prioritize light safety

Don't overlook vehicle maintenance — it's crucial for accident prevention!

1 Check light functionality:

- Before hitting the road, always verify that all lights are working.
- Even during daylight driving, inspect headlights — they might be needed unexpectedly.

2 Keep lights clean:

- Regularly wipe off dirt and clear snow or ice from lights.
- Note that LED lights don't generate heat to melt snow or ice.

3 Inspect trailer lights:

- Ensure the power connection between the power unit and trailer is intact.
- Confirm that trailer lights are functioning correctly.

4 Verify signal lights:

- Test turn signals, stop lamps, and hazard lights.
- Make sure they operate as expected.

5 Conspicuity tape:

- Check conspicuity tape is in the required locations.
- Clean tape will enhance visibility and safety on the road.
